

## SCHOOL BOARD LIAISONS

School Board liaisons exist so that all board members have multiple opportunities to connect with our schools throughout the school year. Board members understand the importance of building strong connections with each of the schools in the district, and the presence of board members in the schools aids the board in making the best decisions possible as they better understand the needs of students. School Board members will be assigned two schools/programs per semester and will rotate through remaining schools. After four years, every board member will have rotated through every school. It is requested that at a minimum, board members schedule a tour with the principal and attend at least one other meeting/event throughout the semester.

Notes regarding the liaison assignments:

- Since board members make all decisions with the good of the entire district in mind, the assignments are not meant to be advocacy positions but to allow board members to gain a broader perspective about the district.
- School board members do not get involved in administrative issues at individual schools but refer concerns to appropriate staff or the superintendent.
- Board members are not limited to only attending events at their assigned school(s).
- The seats will remain constant when new board members are elected

These rotations would start after November 14 approval of the 2019-2020 school year.
